

PARTNERS AND SPONSORS

Companies, associations, foundations or other organizations can take the opportunity of presenting themselves in the foyer of the event hall and establish conversations with participants, speakers and guests. Being part of this exciting event is made as convenient as possible. On the day of the symposium, you walk into the event hall with your products and brochures, and you are ready to go!

All packages include a modular exhibition stand of different types (1, 2, 3, 4), all of which come with an illuminated backwall (motive to be defined and provided by partner) and wooden tables. Some offer storage and chairs as indicated on the next page. All exhibitions stands are set up professionally, electrified and ready-to-use at the day of the event. Disassembly, cleaning and recycling are also included in each package.

The Lucerne Hall is polyvalent and kept simple. The cubed construction made of concrete is slightly offset to the rear to further express the subtle nature. It offers ground floor access and ample space for the plenary, 180–220 participants, the exhibition and a foyer for coffee/lunch breaks. The hall will be structured for the event as indicated on the lay-out above.
